- Standard color for holder is satin black
- Choice of color for lens – clear or green tinted acrylic
- Holders can be painted to match any color
- Cost efficient – quality consistent

Paper Choices

Maintenance

Holders are designed to house laser printed paper inserts. Any type of paper will work with the system. We do have available two choices of colored paper (cream and light gray) sized at 8 1/2" x 11" which are perforated to fit all three sizes. A template (made in Microsoft® Word™) for printing the inserts in your computer and printer is available by download from our website.

Installation

Holders which will be mounted to walls can be installed with double faced foam tape and adhesive. For workstation applications, we recommend the use of hanging brackets which integrate into your workstation panel system. These are available in custom sizes to fit your system.
